INTERNATIONAL PRELIMINARY EXAMINATION REPORT

0 6 SEP 2004

(PCT Article 36 and Rule 70)

WIPO PCT

Applicant's or agent's file reference PU020123	FOR FURTHER ACTION		on of Transmittal of International (xamination Report (Form PCT/IPEA/416)		
International application No.	International filing date (day/mor	th/year)	Priority date (day/month/year)		
PCT/US03/11002 .	11 April 2003 (11.04.2003)		17 April 2002 (17.04.2002)		
International Patent Classification (IPC)	or national classification and IPC				
IPC(7): H03H 7/30 and US Cl.: 375/229)				
Applicant					
THOMSON LICENSING S.A.					
 This international preliminary examination report has been prepared by this International Preliminary Examining Authority and is transmitted to the applicant according to Article 36. 					
2. This REPORT consists of	a total of sheets, including	this cover she	et.		
This report is also accompanied by ANNEXES, i.e., sheets of the description, claims and/or drawings which have been amended and are the basis for this report and/or sheets containing rectifications made before this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions under the PCT).					
These annexes consist of a	total of sheets.				
3. This report contains indica	ations relating to the following	items:			
I Basis of the rep	ort .				
II Priority					
III Non-establishm	III Non-establishment of report with regard to novelty, inventive step and industrial applicability				
IV Lack of unity of invention					
V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement					
VI Certain documents cited					
VII Certain defects in the international application					
VIII Certain observations on the international application					
·					
Date of submission of the demand	Date	of completion	of this report		
17 November 2003 (17.11.2003)		24 August 2004 (24.08.2004)			
Name and mailing address of the IPEA/US Mail Stop PCT, Atm: IPEA/US		Authorized officer			
Commissioner for Patents P.O. Box 1450	Shuv	Shuwang Liu			
Alexandria, Virginia 22313-1450 Facsimile No. (703)305-3230	Telep	hone No. 703	305-4700		
Form PCT/IPEA/409 (cover sheet)(July 1998)					

International application No.	
PCT/HS03/11002	#

I.	Basi	s of the report				
1.	With	regard to the elements of the international application:*				
	\boxtimes	the international application as originally filed.				
	$\overline{\boxtimes}$	the description:				
		pages 1-8 as originally filed				
		pages NONE , filed with the demand				
		pages NONE , filed with the letter of				
	\bowtie	the claims:				
		pages 9-12 , as originally filed				
		pages NONE , as amended (together with any statement) under Article 19				
		pages NONE , filed with the demand pages NONE , filed with the letter of				
	\bowtie	the drawings:				
		pages 1-2 , as originally filed pages NONE , filed with the demand				
		pages NONE, filed with the letter of				
	Ш	the sequence listing part of the description: pages NONE, as originally filed				
		pages NONE , as originally fried pages NONE , filed with the demand				
		pages NONE filed with the letter of				
2.	With	regard to the language, all the elements marked above were available or furnished to this Authority in the				
	langi	page in which the international application was filed, unless otherwise indicated under this item.				
	Thes	e elements were available or furnished to this Authority in the following language which is:				
	П	the language of a translation furnished for the purposes of international search (under Rule23.1(b)).				
	\sqcap	the language of publication of the international application (under Rule 48.3(b)).				
	一	the language of the translation furnished for the purposes of international preliminary examination(under Rules				
		55.2 and/or 55.3).				
3.	With	regard to any nucleotide and/or amino acid sequence disclosed in the international application, the				
	inter	national preliminary examination was carried out on the basis of the sequence listing:				
		contained in the international application in printed form.				
		filed together with the international application in computer readable form.				
		furnished subsequently to this Authority in written form.				
		furnished subsequently to this Authority in computer readable form.				
	\sqcap	The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the				
		international application as filed has been furnished.				
		The statement that the information recorded in computer readable form is identical to the written sequence listing				
	لــــا	has been furnished.				
4.		The amendments have resulted in the cancellation of:				
		the description, pages NONE				
		the claims, Nos. NONE				
	\Box	the drawings, sheets/fig NONE				
5.	Ш	This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).**				
thi	* Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17). ** Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report.					
	-					

. INTERNATIONAL PRELIMINARY EXAMINATION REPORT

v.	Reasoned statement under Rule 66.2(a) citations and explanations supporting su		d to novelty, inventive step or industria	al applicability;
1.	STATEMENT			
	Novelty (N)	Claims	4-10, 13-17, 20 and 22	YES
	• • • • • • • • • • • • • • • • • • • •	Claims	1-3, 11, 12, 18, 19, 21 and 23	NO
	Inventive Step (IS)	Claims	4-10, 13-17, 20 and 22	YES
			1-3, 11, 12, 18, 19, 21 and 23	NO
	Industrial Applicability (IA)	Claims	1-23	YES
		Claims		NO

Claims 1-3, 11, 12, 18, 19, 21 and 23 lack novelty under PCT Article 33(2) as being anticipated by Ogawa et al. (US 5,781, 463).

As shown in figure 8, Ogawa et al. discloses

(1) regarding claim 1:

Supplemental Box

An apparatus for determining convergence of an equalizer, comprising:

an equalizer (1 and 2) output signal;

a nearest element decision device (4A), the nearest element decision device (4A) receiving the equalizer (1 and 2) output signal and creating a decision device (4A) output signal containing permissible symbol values; and

a monitoring circuit (5, 6 and 32), the monitoring circuit receiving the decision device (4A) output signal and applying a test criterion to data contained in the decision device (4A) output signal so as to determine equalizer (1 and 2) convergence.

(2) regarding claim 2:

wherein the equalizer (1 and 2) is formed to include an infinite impulse response filter.

(3) regarding claim 3:

wherein the nearest element decision device (4A) is a slicer.

(4) regarding claim 11:

wherein the monitoring circuit (5, 6 and 32) is a microprocessor.

(5) regarding claim 12:

An equalizer status monitoring device for use in a digital communication system, the device including an adaptive channel equalizer (1 and 2),

a slicer (4A) and

a monitoring circuit (5, 6 and 32), wherein the digital communications system receives a vestigial sideband modulated signal containing high definition video information represented by a multiple level symbol constellation, the data having a data frame format constituted by a succession of data frames, the adaptive channel equalizer (1 and 2) generating a first output signal which is input to the slicer (4A), the slicer (4A) generating a second output signal which is input to the monitoring circuit (5, 6 and 32), the monitoring circuit (5, 6 and 32) applying a test criteria to the second output signal to determine convergence of the adaptive channel equalizer (1 and 2).

(6) regarding claim 18:

wherein the monitoring circuit (5, 6 and 32) is a microprocessor.

(7) regarding claim 19:

In a digital communications receiver including an adaptive equalization filter (1 and 2) that desirably achieves a state of convergence and which undesirably achieves a state of divergence or an invalid state, a method of monitoring the state of the equalization filter (1 and 2) comprising the steps of:

coupling an output signal from the equalization filter (1 and 2) to a monitoring circuit (5, 6 and 32);

causing the monitoring circuit (5, 6 and 32) to examine data contained within the output signal for a finite time period; causing the monitoring circuit (5, 6 and 322) to apply a test protocol to the examined data; and causing the monitoring
